The United Nations Decade for Women 1976-1985 has been instrumental in making people and governments recognise the importance and magnitude of women's role in society.

Midway through the decade, in July 1980, a World Conference was held in Copenhagen, Denmark, to review the achievements and obstacles of the first five years. This Conference served to advance international awareness of the integral part that women are of every global concern in all spheres of life. It adopted a Programme of Action for the second half of the Decade to promote equality, development and peace and the sub-themes of the Decade, employment, health and education.

As a conclusion to the Decade, in July, 1985, the General Assembly convened a World Conference in Nairobi, Kenya, to review and appraise the achievements of the UN Decade for Women.

Soon after independence in 1980, Zimbabwe joined the United Nations as a sovereign state. This meant the nation had only half the period of the Decade to utilise her resources and those offered by the UN agencies for the purpose of uplifting the status of women.

In 1981 the Zimbabwe Government demonstrated its commitment to the UN recommendations and created a Ministry of Women's Affairs to plan and implement programmes for the development of women.

Since then there have been positive changes in employment, education, civic affairs, legislation and some cultural and traditional practices which in the past fostered women's inferiority.

Undeniably the United Nation's Decade for Women has been instrumental in making the Government of Zimbabwe and its people appreciate the importance and magnitude of women's role in society.

The designs, by Cedric Herbert a local artist, are in stylised form and depict three women, each portraying an aspect of women's advancement.

The 10c issue depicts women's place in modern development. Women are as much a vital part of the computer age as men and have proved themselves in the contribution they have made to global technological progress.
The 17c stamp depicts women's contribution to the health of the nation. In their roles as doctors, nurses, teachers, advisors and mothers, women are vital to the wellbeing of the society in which they live and work.

The 26c stamp depicts women's equality in all spheres — education, communication, technology and science — and the scope for women's achievements in the future — given equal opportunities and recognition.

The values of the stamps are puzzling, only the 26c stamp is the airmail rate to Europe. The only use of the 10c stamp is for internal printed paper rate (useful for sending out monthly accounts), and the 17c is the rate for surface postcard anywhere in the world. The last two are not values that are usually produced for a commemorative issue, and are usually seen in definitive issues.

**Issue date:** 13th November, 1985

**Withdrawal from sale:**

**Demonetarisation:** 31st January, 1994

**Listed varieties**

No listed varieties have been noted

**Unlisted Varieties**

There are numerous small dots and specks in the printing of these stamps, particularly in the backgrounds.

**First Day Covers**

The cover numbering comes from the catalogue produced by Geoff Brakspear.

A pictorial first day of issue canceller was produced for this issued and was used by the Philatelic Bureau. Other first day cover cancellers continued to be used at main post offices.
