

Protection Certificates

A Protection Certificate delayed the need to apply for an Inspection Certificate. Initially they were issued at no cost for a period of two months, but a fee of 10/- to cover a two month period was introduced on 10th April 1891.

The holder of a mining location could apply for a certificate prior to the expiry of his current Inspection Certificate on any of the following grounds:

1. Incapacitated by illness.
2. Unavoidably absent from his property due to either burgher service or detained elsewhere on urgent and sufficient private reasons.
3. The property was temporarily unworkable due to causes beyond the owner's control.
4. Any other good and sufficient ground.

The 1895 Ordinance allowed certificates to be issued for multiple periods of two months up to a maximum of six months. The period for which it was valid was stated on the certificate. During its validity the certificate absolved the holder from the need to obtain an Inspection Certificate. The 1898 Ordinance clarified this fee as 10/- per two months or part thereof.

It has been difficult in some instances to determine how the duty applied was calculated.

No. L110 British South Africa Company.
