

Inspection Certificates and Certificates of Extra Work

After a prospector had registered his claim, The British South Africa Company were anxious to insure that the miner was actively exploiting the claim by sinking a shaft 30ft. in depth which had to be completed within four months. On completion of this work he had to apply for an Inspection Certificate at a cost of fifteen shillings. Paragraphs 26 and 27 of the 1890 Ordinance full details of this requirement.

THE BRITISH SOUTH AFRICA COMPANY.

ORDINANCE No. 1, OF 1895.

MAKING PROVISION FOR THE REGULATION OF MINES AND MINING.

Inspection Certificate

22. A Claimholder shall within a period of one hundred and twenty days from the date of posting of his Registration Notice execute at least thirty feet of *bona fide* Development work upon his Block of the nature set forth in the next succeeding Section, and apply to the Mining Commissioner of the district in which such Block as aforesaid is situated for and obtain an Inspection Certificate. In each succeeding year from the close of the aforesaid period of one hundred and twenty days from the date of posting of his Registration Notice a Claimholder shall execute at least sixty feet of Development work of the nature set forth in the next succeeding Section, and shall apply to the Mining Commissioner as aforesaid for and obtain an Inspection Certificate. Every such application shall be accompanied by an affidavit stating the nature and extent of the work which has been executed, and by the last issued (if any) Inspection Certificate in respect of the Block, and the Mining Commissioner shall, if satisfied that the prescribed work has been duly executed, issue to the applicant an Inspection Certificate in the form No. 8 in the Schedule to this Ordinance, which shall bear a stamp of the value of ten shillings. The number of any such Inspection Certificate as aforesaid, whether first, second, third, or otherwise, shall be clearly inscribed upon its face.

The 1895 Ordinance introduced a system of annual inspections which required the claimholder to undertake 30ft of bona fide development work within 120 days of registration and in subsequent years at least 60 feet of development work to obtain an Inspection Certificate. The cost of the certificate was reduced to 10/-. If insufficient work was undertaken the claim was considered to be abandoned.

FIRST SCHEDULE.

MASHONALAND MINING REGULATIONS, No. 1, 1890.

Shaft to be Sunk by Claimholder.

26. Every digger shall sink upon his block of quartz reef either a shaft of a depth of 30 feet in the reef, or a shaft of at least 30 feet outside the reef, with a cross cut through the reef. This work must be completed within four months from the registration of the block of claims, under penalty of forfeiture of his claim license. But the Mining Commissioner shall have discretion under certain circumstances to extend the time for such further period as may seem to him reasonable.

Inspection Certificates.

27. So soon as the claimholder has done the required amount of work, as specified in Clause 26, he shall apply to the Mining Commissioner for an Inspection Certificate, at the same time lodging with the Mining Commissioner an average sample of the reef exposed. When the claimholder has given evidence to the Mining Commissioner that he has opened up a payable reef, and done the required amount of work, he shall receive from the Mining Commissioner an inspection certificate certifying that the required work has been done. If the claimholder shall wilfully make a false representation as to the work done by him, he shall be liable to pay the cost of the Mining Commissioner's inspection. Each inspection certificate shall bear a stamp of the value of fifteen shillings.

However if no work was done, at his discretion a Mining Commissioner could issue a certificate for a cost of £30 or £60 for a subsequent inspection.

The 1898 Ordinance made further changes to the regulations formalising the concept of a certificate by “Work” or by “Payment”. A certificate by Work continued to cost 10/- whereas a “Certificate by Payment” cost

First Inspection	£5
Second Inspection	£10
Third and fourth Inspections	£20
Fifth and subsequent inspections	£30

The need for annual inspections caused concern among claimholders who had registered their claims prior to 1895. To pacify them the 1898 Ordinance decreed that all claims registered prior to 21st August 1895 and for which only one Inspection Certificate had been obtained on or before the 31st December 1898, second, third, fourth and fifth Inspection Certificates would be issued without payment provided they were applied for by 31st December of the year in question. A special Inspection Certificate was introduced for this purpose of which only one example is recorded.

British South African Company.

ORDINANCE No. 1 of 1898.

Inspection Certificate by Payment

33. A claimholder may obtain a first or subsequent inspection certificate in respect of every ten claims, or portion of ten claims (not being claims upon land reserved for the purposes of any town or village) registered under the same official number, on payment to the Mining Commissioner of the sums following :—

For a First Inspection Certificate...	... Five Pounds
, Second " " 	Ten "
" Third " " 	Twenty "
" Fourth " " 	" "
" Fifth or any subsequent Inspection Certificate 	Thirty "

Illustrations of recorded certificates are listed in order of rate of duty not in order of value of stamps used, thus a certificate covering two years and bearing a £1 stamp is listed under Ten Shilling Inspection Certificates.

Permits of Concentration and Certificates of Extra Work are included in this section because of their close association with Inspection Certificates.

Sections 25 and 26 of the 1895 Ordinance introduced the concept of a Permit of Concentration. This allowed a miner to offset additional work undertaken on one claim towards obtaining an Inspection Certificate at the 10/- rate for another claim for which he had not undertaken the prescribed amount of work..

British South African Company.

ORDINANCE No. 1 of 1898.

Certificate of Extra Work

29. A claimholder who has done development work upon any block or blocks of claims in respect of which work he shall not previously have obtained an inspection certificate on any block, or a certificate of extra work, may, upon making a solemn declaration to that effect, describing the nature and extent of such development work, apply for and obtain from the Mining Commissioner a certificate of extra work for each unit of thirty feet of work so done.

30. An original certificate of extra work shall, on presentation to the Mining Commissioner of any district in the province in which the work has been done, entitle the claimholder to whom the said certificate was granted, to have such work regarded as if done upon any block in such district which he shall by solemn declaration allege to belong to him and prove to be registered in his name. Provided that no work done upon any block shall be regarded as done upon any block situated on any land reserved for the purposes of any town or village unless both blocks are located on such land and on the same reef.

A Permit of Concentration cost 10/-. Only one such certificate has been recorded.

The 1898 Ordinance replaced the Permit of Concentration with a Certificate of Extra Work which allowed every extra 30ft. of work done on one location to be offset against another block in order to obtain an Inspection Certificate for that block. However the purpose of both regulations were very similar and the cost was again 10/-

THE BRITISH SOUTH AFRICA COMPANY.

ORDINANCE No. 1, OF 1895.

MAKING PROVISION FOR THE REGULATION OF MINES AND MINING.

25. It shall be lawful for any Claimholder being the registered holder of two or more blocks of Reef Claims situated within the same mining district to obtain on application to the Mining Commissioner of such district a Permit of Concentration, authorising such Claimholder to execute upon any one of such Blocks during a period not exceeding one year the aggregate amount of the Development work prescribed in preceding sections of this Ordinance as necessary to be executed upon such Blocks. A Permit of Concentration shall be in the form No. 9 in the Schedule to this Ordinance and shall

26. Every Claimholder to whom any such Permit of Concentration as in the last preceding Section mentioned shall have been issued shall prior to the expiration of the period covered by such Permit execute the Development work prescribed in such Permit upon the Block specified in such Permit, and apply to the Mining Commissioner of the district in which such Block is situated for and obtain an Inspection Certificate. Every such application shall be accompanied by an affidavit stating the nature and extent of the work which has been executed, and the Mining Commissioner, if satisfied that the prescribed work has been duly carried out, shall issue to the applicant an Inspection Certificate in the form No. 8 in the Schedule to this Ordinance, which shall bear a stamp of the value of ten shillings in respect of every Block to which such Permit relates.
